

Corner College

The corner room in the Perla Moda Gallery was converted into the Corner College. The Corner College is a place for lectures, lunches, workshops and film screenings.

The design was generated by the budget, which was almost nothing. The construction materials were found in the local area. The objects themselves tell their own continuing story. The Football stadium seats become a comfy dinner table accessory, the cellar door a rotatable lamp, the attic walls chair legs and the exhibition walls become a bookshelf.
