

## Table scenery

An interactive decoration made out of printed corrugated cardboard

A great feast! But everything is meaningless without the right scenery. The tableware & decorations, arranged on the table by the host, serve simply as seat reservations or decorations in their pure form. In this work the guest can play with those elements: pushing the fish in the peak of the bird and the crab into the corals. But at the end of the evening everything returns to its place: animals and food „shoo, shoo“, go back to the pretty bouquet in the middle of the table.

Colours: neon red, sea turquoise, raspberry, white
